

# EagleHosting

## Fast, reliable & secure Cloud Hosting

Modern websites need the speed and stability that traditional single-server hosting struggles to provide on a consistent basis. That is why EagleHosting is the web cloud hosting.

By combining multiple servers to handle your traffic and data in a cloud-optimized cluster, your website is not affected by any spikes in traffic or any technical issues that may occur with a server. EagleHosting cloud platform adapts instantly to any changes and makes sure your website is always running at peak performance.

**Our cloud platform adapts instantly to any changes,  
to make sure your website is always running**

You don't have to make any changes to the way you manage your website, or pay for extras to use our cloud hosting, we want all our customers to have the very latest hosting technology as standard.

## Why choose EagleHosting?

### Traffic spike? No problem.

EagleHosting has been designed to instantly adapt to the demands being placed on it. No matter what time of day it is, or if you have an unusually large increase in traffic, your visitors won't notice any difference in performance.

### Say goodbye to downtime

We have minimized the possibility of downtime, thanks to our huge network of load-balanced server clusters, all working to support your website.

### Super-fast page load speeds.

Your website's visitors don't want to hang around waiting for a page to load, so why make them? Use EagleHosting enhanced page load speeds to increase visitor retention rates and satisfaction.

## Features and specifications

We only use Dell servers in EagleHosting's platform to ensure excellent performance for our customers.
